**Attention: Before you begin, be certain that the firearm is safe.**

*Remove the magazine and inspect the chamber making sure that it is empty.*

*We recommend that if you are not comfortable with disassembly of your gun that you consult a gunsmith.*

1. With an Allen wrench, unscrew the RIGHT grip panel and remove it from the gun. If it is a model with wrap around grips, use a flathead screwdriver to remove the screw and carefully peel the panel away.

2. Remove the magazine release and release spring. The release spring is going to be reinstalled with the "Titan" Extended Mag Release.

3. Insert the "Titan" and the release spring into the magazine release slot. Screw the grip panel(s) back into place.

4. Start threading the included screw through the paddle button. Once it starts coming out the other end, screw it to the "Titan". Adjust button to your preferred position.
