

OBSIDIAN⁹TM

WITH ADAPTTM MODULAR TECHNOLOGY

SUPERIOR SILENCE ON ALL 9MM PLATFORMS.

The Obsidian9TM is optimized for 9mm for additional suppression while staying light and compact. Our ADAPT Module gives you 2 lengths in one suppressor, for maximum suppression or weight/length savings. With a diameter of 1.37" the Obsidian9 is compatible with pistol suppressor sights, making it perfect for pistols or sub-guns.

TOP FEATURES

Strategically Placed Engraving

We strategically place the serialized engraving over the thickest Stainless Steel cross section of the suppressor. This allows fast and easy repairs should the suppressor become damaged beyond repair.

ADAPTTM Modular Technology

Now you don't have to choose between a short rifle suppressor and a long one. With ADAPTTM Modules you get two lengths with one tax stamp. So you can have a shorter and lighter suppressor in seconds compared to months.

17-4 Stainless Steel Baffles

Obsidian9 baffles are machined from 17-4 Stainless Steel barstock. This allows for more cleaning options and increases durability. Our baffles also create a gas seal to prevent carbon build up between the baffles and tube for ease of maintenance.

Non-slotted Piston

The Obsidian9/45 uses a non-slotted design creating a full circumference gas seal. This drastically lowers gas blowback for a more enjoyable shooting experience. Obsidian9/45 pistons are cross compatible with SilencerCoTM slotted pistons.

UNCONDITIONAL
LIFETIME
WARRANTY

No matter the problem or how it occurred we will work with you to find a solution and fix it. To prove it, we have no legal print and our average turn around time is within 16 business hours.
